## Introduction

Thank you for downloading “Alphabet Smash Clip Art Pages”!

This PDF can be used in conjunction with Alphabet Smash curriculum or in any way that will enhance your child’s education.

Pictures are best printed in color but black and white will work too. Your child may use crayons, pencils, or markers to add color.

**The Alphabet Smash Book** that your child creates, is a portfolio that combines all things included in the Alphabet Smash book that you will do with your child or that your child achieves independently. It is a wonderful keepsake and can record what your child accomplished for the year.

Create an **Alphabet Book**. Your child may pick out a notebook or I recommend a slip cover notebook that you can tuck a cover into. Find these at Wal-Mart, a local office store or even at yard sales and thrift stores. Decorate a cover with your child.

Remember to have fun. Help your child glue things that begin with each letter onto pages in your child’s notebook. Keep these in the child’s alphabet notebook for each letter of the alphabet.

Teach children to cut out the clip art pictures included in this book, found in magazines and discarded books themselves, then paste them on the letter page. Don’t worry about perfection. Allow your children to take ownership of their work. Allow them to make mistakes and to enjoy the process and the sense of accomplishment in the successes. I found it fun to get magazines like *Ranger Rick* or *National Geographic* and add pictures they find to their alphabet pages. Once we even taped a dead ant to the “A” page, traced and painted fingernails with real polish for the “F” page, or a put a lock of hair on the “H” page. Be creative.

May the Lord richly bless you as you teach your children!

Let the Alphabet Smash begin!!!!
